

Pavleen Thukral | Founder and CEO at Stackfolio

Pavleen Thukral, along with Allen Nance, founded Atlanta-based Stackfolio in 2015. Stackfolio is a fintech startup that uses modern technology to serve a vibrant online marketplace for loan trading between financial institutions. The integrated data research platform helps institutions make sophisticated trading decisions. Prior to starting Stackfolio, Pavleen spent more than 5 years of Technical Experience with the NSA, Bloomberg, and Pattern Recognition Research with Thad Starner, father of Wearable Computing.

Chau Nguyen | Founder and CEO at Hirewire

Chau Nguyen is a serial technology entrepreneur, and most recently launched Hirewire, the first on-demand hiring marketplace connecting hourly job seekers and employers. Employers can run a search and filter candidates by location, experience, availability, and instantly view job seeker profiles with job history, video interview, and message directly within the app. Hirewire currently serves 4,000 employers and 100,000 job seekers within the service industry in Atlanta with plans to expand to additional cities and industries in 2017. Hirewire was recently named to the list of Top 10 Most Innovative Companies by TAG and to date has raised \$3.9M in funding to improve the way hiring is done.

Chau was named one of the Highest Rated CEOs of 2014 among small to mid-sized companies by Glassdoor and voted to the annual list of Most Loved CEOs in America 2014 by Inc. Magazine.

Dr. Musheer Ahmed | CEO, CTO and Founder at FraudScope

Dr. Musheer Ahmed completed his PhD in Computer Science from Georgia Institute of Technology where he specialized in the area of Healthcare Security. A report by the JASON advisory group, the prestigious scientific advisory panel to the US government, validated that his doctoral research tackled some of the biggest challenges within the emerging health data infrastructure in the United States. He was invited to Washington DC to give a talk at a meeting hosted by the federal government to discuss improvements to the security and accountability within the federal standards of health information exchange. His research on reducing losses in the US healthcare system due to fraud, waste and abuse forms the core of the proprietary 'Claims Intelligence' technology which is used by FraudScope.

Chrissa McFarlane | Founder + CEO at Patientory

Chrissa McFarlane is an entrepreneur with a passion for creating cutting-edge healthcare products that transform the face of healthcare delivery in the US and abroad. Her commitment to transforming healthcare are rooted in her leadership, planning and organizational skills enhanced by prior endeavors. She's helped create breakthrough digital health companies that provides services to companies such as Tumblr, Blue Apron, Casper and Meetup. Chrissa launched Patientory after seeing the need in the market for more personalized care. Patientory connects patients with their doctors, caregivers and a community of individuals with similar health issues. The company was recently ranked a top 5 app empowering patients in the world and is making waves on the digital health scene using the security of block chain technology.
