

Midtown's southernmost section of Peachtree Street from Ponce de Leon to Pine Street will receive a facelift to enhance this important link between Midtown and Downtown Atlanta. The Midtown Improvement District has pledged \$2M to fully fund the improvements, which include new sidewalks, curbs, handicap ramps, street furniture, and bicycle facilities, as well as street pavement resurfacing and restriping, supplemental street lighting and landscaping. A new mid-block crosswalk and pedestrian-activated (HAWK) signal will be installed between Renaissance Parkway and Emory University Hospital Midtown.

Design was completed and permitted in mid-2015. Construction is underway to be finished by Fall 2016.
